1. About 12 km. from Dzialdowo (5314N 2011E) towards Ciechanowo there is a railway station called Ilowo opposite which there is a wood running for about three km. along the western side of the railway. From Ilowo station a branch line has been built which runs into the wood and is used for the transport of large quantities of building materials for the construction of what is believed to be a military depot. The buildings which have already been completed are placed close together and are all either bungalows or of one story only, none rising above the level of the tree tops. All are of brick.
2. The whole area is already surrounded by a barbed wire fence about three meters high which runs along the edge of the wood to the south and then turns along its southern boundary. In two places there are wooden watchtowers rising above the trees, each manned by two soldiers armed with light machine guns. Between the railway and the ground where the buildings have been erected a strip of trees about 120 meters wide has been left, partly screening the buildings.
3. In the southern part of the woods, which are very hilly, underground buildings are being constructed. In all, many dozens (sic) of buildings are concerned. Many workmen have been seen in the area and nearby, including members of the SP (Service to Poland). KBW (Internal Security Corps) soldiers have also been seen, which may indicate the use of forced labor units. The depot was begun in autumn 1953 and may be finished before the end of this year.
